

JUDE OYOVBAIRE

Platform Architect for AI Infrastructure

Amsterdam, Netherlands • judeoyovbaire@gmail.com • linkedin.com/in/judeoyovbaire • judaire.io

PROFESSIONAL SUMMARY

Platform Engineer with 10+ years designing and operating cloud-native infrastructure across AWS, GCP, and Azure for high-throughput, regulated and security-sensitive systems - including defence intelligence, fintech payment platforms, and eCommerce platforms powering billions in revenue. Expert in Kubernetes at scale, Infrastructure-as-Code with Terraform, and GitOps-driven CI/CD. Proven technical leader: architected multi-tenant platforms, owned cross-team RFCs, led 5 DevOps transformations, and mentored 20+ engineers - achieving 99.99% platform availability, 40% faster delivery, and €900K+ in annual savings. Active adopter and advocate of GenAI tooling (Claude Code, Cursor, MCP-driven workflows) to accelerate team delivery and elevate developer productivity.

TECHNICAL LEADERSHIP & IMPACT

- Platform Scale: 100M+ requests/day, 200+ production services across multi-cloud Kubernetes platforms, 99.99% availability with 12-minute MTTR
- Transformation: Led 5 DevOps transformations across fintech, eCommerce, data-intensive, defence intelligence, and healthcare SaaS environments
- Cross-Team Leadership: Owned multi-tenancy architectural RFC (recommending schema-per-tenant for biopharma compliance); drove Developer Enablement documentation standards
- Mentorship: Mentored 20+ engineers across platform, SRE, and cloud disciplines; established runbooks, golden paths, and self-service tooling patterns
- FinOps & Efficiency: €900K+ annual savings via Reserved Instance strategy, cluster right-sizing, observability consolidation, and IaC-driven automation
- Developer Experience: 60% support-ticket reduction through self-service portals, IDP adoption (Backstage), and golden paths

PROFESSIONAL EXPERIENCE

myTomorrows • Amsterdam, Netherlands

Feb 2026 - Present

Senior DevOps Engineer - Healthcare SaaS - AWS EKS modernization & multi-tenancy

- Driving platform modernization across AWS EKS infrastructure for a regulated healthcare SaaS, including observability migration to the LGTM stack and multi-tenancy architecture review for biopharma compliance
- Built production infrastructure for LLM-powered healthcare products: KEDA-driven autoscaling for batch LLM inference workloads, CloudFront VPC Origins for zero-exposure production APIs, and load-validated capacity (152 req/s, zero failures) on AWS EKS
- Progressing a cross-team Developer Enablement initiative - internal documentation standards, onboarding runbooks, and self-service patterns to elevate engineering-wide technical capability
- Standardization of Google Cloud Platform with Terraform for data pipelines, BigQuery, and AI/ML workloads, including GPU-backed infrastructure for emerging ML use cases

Datenna B.V. • Eindhoven, Netherlands

Jan 2025 - Jan 2026

Senior DevOps Engineer - Defence intelligence platform - Azure infrastructure, policy-as-code, and platform scalability

- Architected and optimized Azure platform scalability and reliability for defence-intelligence workloads, supporting data-intensive analytics, analyst tooling, and security-sensitive pipelines
- Implemented Policy-as-Code with Open Policy Agent (OPA) for governance across AKS clusters, enforcing security, cost, and compliance guardrails at scale
- Automated provisioning of Azure-native resources (AKS, VMs, Storage, Databricks) using Pulumi and Crossplane across multiple environments, improving deployment speed and consistency
- Deployed and managed Azure Databricks clusters, automating access controls and cost optimization practices to support data engineering teams
- Led incident response during on-call rotations; championed blameless post-mortems and developed automation tools to reduce manual toil and improve deployment reliability

PVH Europe B.V. • Amsterdam, Netherlands

Apr 2022 - Dec 2024

Senior DevOps Engineer / SRE - Tommy Hilfiger & Calvin Klein eCommerce - AWS EKS at scale

- Designed and executed AWS cloud infrastructure strategy for Tommy Hilfiger and Calvin Klein eCommerce platforms powering billions in revenue across EU markets, enhancing scalability and fault tolerance
- Orchestrated containerized microservices on AWS EKS with high-availability and autoscaling configurations for traffic-intensive retail events and global launches
- Led migration to Amazon OpenSearch, 60%+ license cost reduction ($\approx$ 25% total observability spend), while maintaining high data fidelity and query performance
- Automated infrastructure deployments using Terraform and Terragrunt, improving deployment efficiency by 30%; maintained an “Everything-as-Code” approach (IaC, Monitoring-as-Code, pipelines)
- Built and operated CI/CD pipelines with GitHub Actions, integrating security scanning and compliance checks throughout the software delivery lifecycle
- Collaborated with product and engineering teams to embed reliability and security best practices across the application lifecycle

BOC Group • Vienna, Austria

Jul 2021 - Mar 2022

DevOps Engineer

- Designed and deployed scalable AWS cloud infrastructure for enterprise applications, ensuring high availability and performance
- Managed Kubernetes (EKS) clusters and Helm releases, delivering reproducible builds and streamlined application deployments
- Implemented AWS cost optimization strategies, reducing operational expenses without compromising performance
- Developed and maintained CI/CD pipelines to automate testing and deployment, accelerating release cycles
- Participated in on-call rotations and incident response, diagnosing and resolving production issues efficiently

Kudi Inc. • Abuja, Nigeria (Fintech / Payments)

Aug 2020 - Feb 2021

DevOps Engineer

- Designed and operated scalable infrastructure on Google Cloud Platform for a high-transaction-volume fintech platform, optimizing resource utilization for regulated financial services workloads
- Managed Kubernetes clusters on GKE, enabling seamless deployment, autoscaling, and high availability for microservices-based payment systems
- Maintained Terraform IaC repositories ensuring consistent, reproducible infrastructure across environments; contributed to DevSecOps practices aligned with financial services compliance requirements
- Implemented observability with Prometheus and Grafana, improving incident detection, MTTR, and system reliability for transaction-critical workloads
- Collaborated with development teams to integrate reliability and security practices into deployment pipelines for a regulated fintech environment

NubesCode Ltd. • Abuja, Nigeria

Jan 2019 - Jul 2020

DevOps Consultant

- Designed and managed multi-cloud infrastructure on GCP (GKE) and AWS (EKS) for client engagements, enabling high availability and efficient resource utilization
- Implemented ELK Stack monitoring solutions, reducing incident resolution time and improving reliability across client environments
- Participated in on-call rotations and led incident response efforts, driving rapid issue resolution

Earlier Career • Infrastructure & SAP Technical Specialist

2014 - 2018

- Built foundational technical expertise in enterprise systems, on-premises infrastructure, and datacenter operations
- Led SAP implementation and migration projects at the Nigerian National Petroleum Corporation, developing project leadership, stakeholder management, and technical training skills across complex on-premises environments

TECHNICAL EXPERTISE

Cloud Platforms

- AWS: EKS, Lambda, RDS, OpenSearch, EventBridge, SNS/SQS, IAM, CloudWatch - eCommerce and healthcare SaaS

- Google Cloud Platform: GKE, Cloud Build, CloudSQL, IAM, Cloud Storage - data pipelines, BigQuery, AI/ML workloads, and FinTech payment workloads
- Azure: AKS, Databricks, ARM, Storage, Entra ID - data-intensive and defence-intelligence enterprise workloads

Operating Systems & Linux

- Production Linux administration (Ubuntu / Debian / RHEL): systemd service management, LVM, networking, kernel-level troubleshooting, secrets and access-control hardening
- Comfortable in security-sensitive environments with audit, change management, and need-to-know access controls

Kubernetes & Platform Engineering

- Multi-cluster management, Service Mesh (Istio), Operators, Helm, cert-manager, Ingress (NGINX, Traefik)
- Self-Service Portals, Internal Developer Platforms (Backstage), Service Catalogs, golden paths
- Policy-as-Code (Open Policy Agent), RBAC, NetworkPolicy, Zero-Trust Architecture

IaC, GitOps & CI/CD

- IaC: Terraform, Pulumi, Crossplane, Terragrunt, Ansible
- GitOps: ArgoCD, FluxCD, Codefresh (GitOps Fundamentals & Scale certified)
- CI/CD: GitHub Actions, GitLab CI, Jenkins, CircleCI - security scanning, compliance checks, secret management, release automation

Reliability, Observability & SRE

- 99.99% uptime practice, SLO / SLI / Error Budgets, Chaos Engineering, Multi-Region HA and DR
- Datadog, Prometheus, Grafana, OpenSearch / ELK, OpenTelemetry, LGTM stack
- Incident management, blameless post-mortems, on-call rotations

Security, Compliance & DevSecOps

- OAuth 2.0, SAML / OIDC, SSO, MFA; LDAP / AD integration
- Secret Management (HashiCorp Vault, Infisical, External Secrets Operator); TLS management
- Container security, vulnerability scanning, compliance automation, DevSecOps pipeline integration
- Regulatory alignment: GDPR, ISO-27001 context, fintech compliance exposure, defence-adjacent change-management practices

Languages & Scripting

- Python, Golang (controllers, automation, tooling), Bash

MLOps & AI Infrastructure

- Public MLOps platform reference project: github.com/judeoyovbaire/mlops-platform
- GPU and AI/ML workload infrastructure on AWS and GCP for production model serving and experimentation
- Exploratory work on AWS Bedrock architectures, Modal, Kubeflow, KServe, and vLLM for production ML workloads
- Active adoption of Claude Code, Cursor, and MCP-driven workflows for infrastructure automation and developer productivity

CERTIFICATIONS

- HashiCorp Certified: Terraform Associate
- Certified Kubernetes Administrator (CKA)
- Certified Kubernetes Application Developer (CKAD)
- Kubernetes & Cloud Native Associate (KCNA)
- Kubernetes & Cloud Native Security Associate (KCSA)
- AWS Certified Solutions Architect - Associate
- AWS Certified Cloud Practitioner
- Microsoft Certified: Azure Fundamentals
- Codefresh GitOps Certified Fundamentals
- Codefresh GitOps Certified Scale

EDUCATION

- M.Sc., Computer & Network Security - Middlesex University, London, United Kingdom
- B.Sc., Computer Science - Benson Idahosa University, Benin City, Nigeria
